

## SKILL & EFFICIENCY

Clinox Pro X2 performs immediate ecofriendly treatment of TIG, pulsed-arc MIG, submerged arc, laser, resistance, orbital, plasma, and tack welding. The advanced technology of Clinox Pro X2, through an immediate electrochemical reaction, ensures pickling, passivation and polishing of any stainless steel weld, irrespective of the finish, without wasting time, without leaving rings, and in complete safety for the operator.

The machine is equipped with a fume abatement system through suction.

power output	900W			
power selection	15A	30A		
tank	1,8l			
dimensions lwxh - weight	543 mm	228 mm	315 mm	18kg
included torch	torch through suction with 3m cable			
optional torches	small	dip&work	marking
